

TERMINAL | CHEATSHEET

`pwd`

prints the current working directory, i.e., tells you where the Terminal/command line is currently operating from

`ls`

lists the contents of the current working directory, i.e., names of any files or folders contained within the current working directory

`cd <path>`

changes the current working directory to the directory specified in the <path>

`cd ..`

reverts to the parent of the current working directory, i.e., if you are inside /Users/XYZ/Documents, "cd .." will take you to /Users/XYZ

`clear`

clear the command line window
